## Self evaluation check list- Approaching MAppERS – C

The purpose of this checklist is to support the citizen approaching MAppERS app to evaluate his/her level of preparedness and knowledge about self-protecting behaviours to be adopted in preparation for and while coping with flood risk and recovery.

This questionnaire is to be filled by the user before visualizing the video tutorial and the user's booklet. By answering these questions the attention of the user is raised towards main issues to be taken into account when preparing for an hazardous event and dealing with an emergency situation. This additional tool is aimed at raising awareness in the user about self protecting behaviours, by stimulating his/her own attention to certain details, and then forwarding to the App tutorial as the App itself for further in-depth information.

Thus, after filling in the questionnaire, self-checks can be made by browsing through the app, with the aid of the video tutorial and booklet.
